			Statement of Reasons for Allowance

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on April 17, 2003, Nicole Kinsley requested an extension of time for 1 MONTH(S) and authorized the Commissioner to charge Deposit Account No. 13-3402 the required fee.

- 2. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- The application has been amended as follows:
 Claim 39 has been amended to recite - An isolated nucleic acid consisting of
 SEQ ID NO: 33. -
- 4. The following is an examiner's statement of reasons for allowance.

Upon further consideration of the examples and disclosure provided in the specification, the examiner determined that a polypeptide consisting of SEQ ID NO: 238 was not enabled, since the specification had only demonstrated that the partial cDNA of SEQ ID NO: 33 was over expressed in endometrial tumor tissue. As evidenced by the Table on page 170, the DNA sequence encodes three polypeptides, namely SEQ ID NO: 238, 239, 240. The specification does not teach nor assert that each of these

polypeptides are over expressed in endometrial tumor tissue. Therefore, as discussed in the interview summary, the examiner called applicant and offered applicant the opportunity to switch inventions to a nucleic acid consisting of SEQ ID NO: 33, which has been shown to be over expressed 39 times in endometrial tumor tissue as compared to normal endometrial tissue.

The closest prior art is directed to nucleic acids for human lipophilin C consisting of 496 nucleotides (Genbank Accession Number AJ224173, March 25, 1999). The nucleic acid, when compared to SEQ ID NO: 33 is 93.6% similar with 99.8% local similarity.

The art also teaches a human mammaglobin B precursor mRNA consisting of 517 nucleotides which has 93.2% similarity with SEQ ID NO: 33 (Genbank Accession Number AF071219, November 26, 1998).

The art neither teaches nor suggests a nucleic acid consisting of SEQ ID NO: 33.

- 5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeanine Goldberg whose telephone number is (703) 306-5817. The examiner can normally be reached Monday-Friday from 8:00 a.m. to 5:30 p.m.

Application/Control Number: 09/673,395

Art Unit: 1634

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones, can be reached on (703) 308-1152. The fax number for this Group is (703) 305-3014.

Any inquiry of a general nature should be directed to the Group receptionist whose telephone number is (703) 308-0196.
